SOHIT VISHWAKARMA

Network & Infrastructure Engineer | Routing, Switching, Firewalls | Python Automation

Lucknow, India | +91 9140501084 | isohitv@gmail.com | linkedin.com/in/sohit-vishwakarma | github.com/SOHITVISH

PROFESSIONAL SUMMARY

Network Infrastructure Engineer with 2.5+ years running the network for a live international airport: 20+ Cisco Catalyst switches, 55+ Ruckus APs, Sophos Firewall in Active/Standby HA, and 24/7 NOC monitoring. Automate config backup and verification with Python (Netmiko/NAPALM) to cut manual work. Sophos and FortiGate certified; CCNA in progress.

CORE TECHNICAL SKILLS

Routing & Switching: Cisco Catalyst L2/L3, OSPF (Single & Multi-Area), Static/Default Routing, Route Redistribution, 802.1Q VLAN, STP/RSTP, Port Security, Inter-VLAN Routing, DNS, DHCP, Subnetting
Firewall, VPN & Security: Sophos Firewall (Active/Standby HA), FortiGate, IPsec Site-to-Site VPN, SSL/Remote Access VPN, ACL, NAT, IDS/IPS, Threat Log Analysis
Wireless & Access: Ruckus APs (802.11 a/b/g/n/ac), 802.1X, WPA2-Enterprise, RADIUS, NAC
Automation: Python (Netmiko, NAPALM, Paramiko, REST API), Bash, PowerShell (AD Automation), Git/GitHub, JSON/YAML
Directory & Systems: Active Directory (Provisioning, GPO, OU Mgmt), Linux (Ubuntu/CentOS), Windows Server, SSH, System Hardening
Monitoring & Diagnostics: Wireshark, Infron NMS, SolarWinds, Zabbix (SNMP), Nmap, ITSM/ITIL Workflows
Physical Security Systems: Honeywell CCTV (300+ Cameras), FIDS, Access Control
Familiar with: BGP Fundamentals, Ansible, AWS (VPC, EC2, S3, IAM), Azure Fundamentals

PROFESSIONAL EXPERIENCE

IT Engineer – Network & Infrastructure
Sep 2024 – Present

SK Integrated Consultants | Maharishi Valmiki International Airport, Ayodhya Dham | 24/7 Aviation Environment

- Own the enterprise network for a live international airport: 20+ Cisco Catalyst L2/L3 switches, 55+ Ruckus wireless APs, and Sophos Firewall in Active/Standby HA across multiple zones.
- Diagnose and resolve L1/L2 faults (VLAN misconfiguration, 802.1Q trunk/access failures, STP/RSTP issues); maintain OSPF single-area routing, static/default routes, and inter-VLAN routing.
- Built Python (Netmiko/NAPALM) scripts for config backup, OSPF neighbor verification, and interface reporting, replacing manual daily checks.
- Deployed IPsec Site-to-Site VPN tunnels between airport zones on Sophos Firewall; own HA rule reviews, IPS/NAT policy tuning, and threat log analysis.
- Administer Active Directory (provisioning, GPO, OU management) with PowerShell automation for recurring tasks.
- Run 24/7 NOC monitoring on Infron NMS: real-time incident response, RCA, and escalation.
- Maintain 99%+ uptime across FIDS, 300+ Honeywell CCTV cameras, and access control through proactive monitoring.
- Use Wireshark for packet-level analysis of L2/L3 issues, TCP/IP handshake failures, and broadcast storms.
- Administer Linux and Windows servers over SSH; write Bash scripts for log parsing, health checks, and automated backups; maintain topology diagrams for audits.

Analyst – Application Support
May 2024 – Sep 2024

Wipro Limited | Hyderabad, India

- Monitored production applications and resolved 50+ backend incidents/month with 95%+ SLA adherence using ITSM/ITIL workflows.
- Worked with DevOps, Development, and QA teams to diagnose production issues; documented RCAs and knowledge base articles.

Software Developer Intern
Dec 2023 – May 2024

Arivani Technologies | Lucknow, India

- Built database-driven web apps (Python Flask/Django, JavaScript); contributed to a live production React.js 360° Virtual Tour app (iariv.com); managed MySQL/MongoDB and REST API integrations.

KEY PROJECT

MVI Airport IT & Network Infrastructure – Deployment & Commissioning
Sep 2024 – Apr 2025

- Deployed and commissioned the airport network and IT stack: structured cabling, switch/AP rollout, Sophos Firewall HA, NMS integration, AD, CCTV, FIDS, and access control. Live international operations ran on it from day one.

LAB & AUTOMATION PROJECTS

- **Cisco Routing & Automation Lab (EVE-NG):** 3-router OSPF + VLAN/STP lab with pfSense; automated config backups with Python + Netmiko, saving 4+ hrs/week of manual work.
- **Network Monitoring Lab (Zabbix):** SNMP-based device monitoring with automated alerts and custom CPU/memory/interface dashboards.
- **Python Network Automation Toolkit (GitHub: SOHITVISH):** Netmiko/NAPALM scripts for automated backup, OSPF verification, and log/interface analysis.

CERTIFICATIONS

- Sophos Certified Network Engineer (2025) • FortiGate Administrator, Fortinet (2026) • Network Security, Cisco • Networking Devices & Configuration, Cisco • Networking, Cisco
- CCNA: Networking, Switching, Addressing & Routing (In Progress) — Logical Operations
- Cybersecurity Consulting Job Simulation, PwC/Forage • Cybersecurity Analyst Job Simulation, Tata/Forage

EDUCATION

B.Tech, Computer Science Engineering — Integral University, Lucknow (GPA: 7.8) **2020 – 2023**

Diploma, Computer Science Engineering — Integral University, Lucknow (GPA: 8.2) **2017 – 2020**

Available for Immediate Joining | Open to Relocation Across India
